

## P782108

### AIR FILTER, SAFETY RADIALSEAL

#### Why Choose Donaldson Safety Filters?

Safety filters have two functions: to act as a backup to the primary filter and to protect the engine during primary filter servicing.

- Serve as a backup filter in case of primary filter damage or improper installation.
- Prevent contaminants from entering the clean side of the air intake system during primary filter servicing.
- Designed to plug rapidly if contamination finds its way past the primary filter, alerting operators about an issue.
- Recommend that safety filters are replaced with every third primary filter change unless there has been a failure of the primary filter.

#### Attributes

|                     |                        |
|---------------------|------------------------|
| Outer Diameter      | 137.5 mm (5.41 inch)   |
| Inner Diameter      | 122 mm (4.80 inch)     |
| Length              | 509 mm (20.04 inch)    |
| Efficiency Test Std | ISO 5011               |
| Primary Application | ATLAS COPCO 2914502400 |
| Type                | Safety                 |
| Style               | Radialseal             |

Brand
